DevOps Engineer with 4 years of experience in CI/CD pipelines, AWS, Azure, Docker, and Jenkins. Skilled in automating workflows, optimizing performance, and ensuring scalability. Collaborates with teams to deliver secure, efficient solutions using Git and Zabbix.

SKILLS

Cloud & DevOps Tools	Azure | AWS | Docker | Jenkins | Terraform | Kubernetes
Scripting & Automation	Python | Bash | PowerShell
CI/CD & Version Control	Git | GitLab CI/CD
System Administration	Linux | Windows Server | VMware ESXi | Backup Scheduling
Database Management	MySQL | MongoDB | SQL Server

WORK EXPERIENCE

DevOps Engineer — Jan 2022 - Present

PanApps INC , Muttom, Aluva, Ernakulam

- **Developed and maintained Jenkins pipelines and script for automated build, test, and deployment processes, improving release frequency by 30%.**
- **Utilized Git for version control, implementing branching strategies to support parallel development for multiple teams.**
- **Proficient in administering Azure and AWS cloud resources, optimizing deployment and resource allocation. Proficient in managing and maintaining Windows Server and Linux environments, ensuring optimal performance and reliability.**
- **Implemented Zabbix for real-time monitoring of application performance, reducing incident response time by 22%. Facilitated cross-functional team collaboration through Agile methodologies, improving deployment cycles by 20%.**
- **Developed Python scripts to automate server patching and configuration, saving 15 hours of manual work per month. Deployed, managed, and scaled containerized applications using Docker and Kubernetes.**
- **Administered Windows and Linux servers, implementing automated backups and disaster recovery plans, achieving 99.9% uptime and experienced in software installation and supporting end-to-end operations with a focus on efficiency and security.**
- **Worked in website hosting, including configuration and uptime management, Competent in Office 365 administration, ensuring seamless user management and service delivery.**

Network Technician, Fiber Optics — Aug 2021 - Jan 2022

Jio , Kollam

- **Conducted site surveys to validate customer's infrastructure deliverables.**
- **Adhered to safety policies and procedures to install or remove IP set-top devices, optical network terminals and wireless access points.**
- **Worked in close collaboration with personnel in other departments to develop and install laser systems.**
- **Setup and operated all equipment according to manufacturers' instructions to maximize precision and functionality.**

EDUCATION

Diploma: Sree Narayana Polytechnic College, Kottiyam, Kollam 82% **Jun 2017 - Apr 2020**
Electronics Engineering

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate **Sep 2023 - Sep 2026**

Demonstrates expertise in implementing, managing, and monitoring Microsoft Azure environments. Proficient in configuring and maintaining Azure infrastructure, including virtual machines, storage, networking, and identity management. Skilled in deploying and managing cloud resources, ensuring security, compliance, and optimal performance. Experienced in automating tasks using PowerShell and Azure CLI, with a strong understanding of Azure governance and cost management principles.

Cisco Certified Network Associate **Jul 2021 - Jul 2024**

Earned the globally recognized Cisco Certified Network Associate (CCNA) certification, demonstrating proficiency in core networking concepts and Cisco technologies. Skilled in configuring, managing, and troubleshooting medium-sized routed and switched networks, with expertise in IP connectivity, network security, LAN/WAN technologies, routing protocols , VLANs, and network automation fundamentals. Adept at ensuring network performance, reliability, and security to support organizational IT infrastructure.

Diploma In Computer Applications **Apr 2018 - Present**

A comprehensive program focused on building foundational and practical skills in computer applications, including proficiency in programming languages, database management, web development, and office automation tools. The course covered key areas such as C, C++, Java, SQL, HTML, CSS, and software like MS Office, equipping me with the ability to develop and manage computer-based solutions efficiently. Successfully completed hands-on projects and practical assignments to apply theoretical knowledge in real-world scenarios, enhancing problem-solving and technical expertise.
